

Seagate Systems

- Seagate® Systems are tightly integrated and pre-configured for smooth and easy deployment
- Enjoy special pricing on our most popular pre-configured enterprise storage systems for a limited time
- Get high-speed performance, industry-leading density, and cost-optimized scalability—all at best-in-class value

Faster, Denser, and More Scalable Than Ever

Discover a better way to scale your enterprise and safeguard critical data with Seagate Systems—now available at an exceptional price.

Meet our most popular plug-and-play platforms.

Seamlessly Integrated for Easy Deployments
Don't worry, we took care of the hard part for you. Simplify your storage deployment with our tightly integrated, pre-configured storage systems.

Enterprise-Grade Reliability, Best-in-Class Value
With more than 40 years in the industry, we know data storage. Lower your TCO with our trusted products and services—available now with special pricing.

Max Capacity Meets High-Speed Performance
We want you to have the best of both worlds. Store more for less with industry-leading density and never sacrifice performance.

A SMALL PACKAGE WITH A PUNCH: THE EXOS X 5U84

Exos® X 5U84, a just-right hybrid RAID configuration, is the datasphere's ultra-dense, intelligent solution for maximum capacity and performance at an exceptionally low TCO.

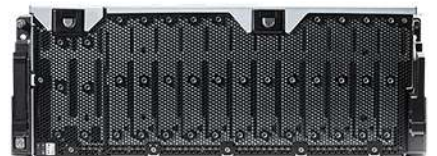

EXOS X 2U12: LOWER COST CAPACITY

Exos X 2U12 is an entry-level SAN that delivers advanced data protection, capacity, and performance at an optimal cost.

NYTRO X 2U24 FOR DEMANDING DATA

Seagate Nytro® X 2U24 is the datasphere's affordable all-flash array (AFA) system for critical workloads that demand the highest performance.

INDUSTRY-FIRST CAPACITY WITH EXOS E 4U106

Seagate Exos E 4U106 is the datasphere's largest building block delivering industry-first capacity and density without sacrificing data access speed.
