Smarter technology for all   **Lenovo**

Create a workspace strategy that works.

As the workplace decentralizes and working preferences evolve, you need to meet the unique needs of a distributed workforce and make sound real-estate decisions. Lenovo provides configurable dashboards to understand occupancy levels and employee proximity, while respecting privacy and data security.

Always-on battery-powered occupancy sensors deliver 99.7% data accuracy and enable rapid deployment.

Technology, insights, and advice for CRE created by CRE experts.

Proven solution with over 20M square feet, measured in over 30 Fortune 500 companies.

Lenovo Installation and Management Services ensure solution availability and reliability.

**REGION AVAILABILITY: NA, EMEA, AP**

RELOGIX

Get intelligent about conference rooms.

Put an end to delayed and postponed meetings due to conference room confusion. By streamlining the booking and use of conference and huddle rooms, you ease frustration, boost teamwork, and enable big ideas to come to life.

As employees return to work, Lenovo helps you manage workspaces in a reduced real-estate footprint and maximize efficiencies for your hybrid workforce.

Schedule any space with a simple Workspace Scheduling software.

Control every workspace through a single solution.

Use pre-built integrations with programs like Outlook, Zoom, and Teams.

Identify actionable insights for office space with smart data tools.

Flexible working
without the hassle.

Digital Signage

LEARN MORE »

Create signage that gets noticed—and inspires action.

Digital signage throughout your workspace can enhance communication among employees, ensuring important messages are consistently delivered and allowing for location-specific information. Customer-facing digital signage gives your business the opportunity to positively engage customers, enrich brand recognition, and boost loyalty.

Lenovo's Digital Signage solutions transform ordinary displays into powerful communication tools, extending the reach, availability, and accuracy of timely messaging.

- Create dynamic branded content with video and images.

- Save time with a user-friendly interface for flexible scheduling.

- Quickly create and update content for single site or across enterprise.

- Protect the integrity of content with end-to-end encryption.

REGION AVAILABILITY: WORLDWIDE

L SQUARED
DIGITAL SIGNAGE

Foster flexibility, collaboration, and productivity.

Enable employees to work productively wherever they are, while supporting collaboration across locations and business functions. Lenovo's intelligent conference room and station allocation systems digitalize your workspaces, improving employee productivity and reducing business costs.

Support a variety of station allocation methods according to your needs, including fixed, mobile, and instant stations.

Visualize the use of seats and edit your floorplan in real time.

Use station-data reporting to get insights by department, branch, or other dimensions, allowing for usage statistics and intelligent reports for predictive station management.

**REGION AVAILABILITY: PEOPLE'S REPUBLIC OF CHINA**

KUBAN

Watch over your workspace 24/7.

Gone are the days of complex (and often useless) video security systems that result in endless hours of video to review. Plus, passive video reveals what has already happened, allowing for reaction only, with no real-time notification of live-action capture.

Lenovo's innovative technology, along with Ava smart cameras, deliver next-gen AI video security solutions for proactive monitoring to better protect your enterprise and improve operations.

Flexible camera options— direct-to-cloud or bring-your-device—with 30-120 days of recording storage.

Machine learning, configurable, and predictive analytic capabilities.

Flexible hybrid cloud solution to support large or small sites, based on bandwidth needs.

Openpath integration, including real-time forced entry notification and automatic occupancy-level entry disabling.
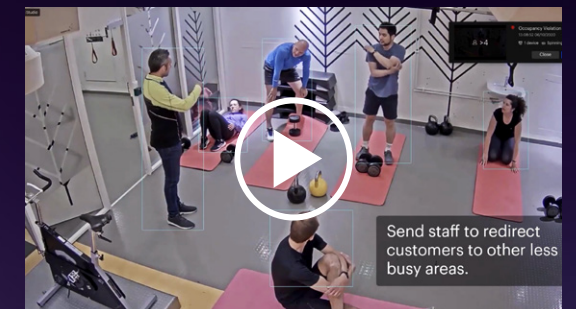

Ava video analytics for public health compliance

Ava Aware video view and object detection

REGION AVAILABILITY: NA, LATAM, EMEA, AP

AVA

Modern Building Access

Open the door to better access, security, and efficiency.

There's a place for plastic keycards and fobs in the modern workplace, but it's time to consolidate and manage access infrastructure to reduce costs and streamline systems. In partnership with Openpath, Lenovo delivers access solutions with real-time monitoring and updates, creating security compliance and a safer occupant experience.

- **Hands-free access** limits touchpoints on doors enabled with automatic door controls.

- **"Triple-lock" technology** authenticates securely with mobile phone.

- **Designed to integrate** with existing infrastructure and legacy systems.

- **Cloud-based access** for administration and management.

REGION AVAILABILITY: NA, EMEA, AP

openpath

Consolidate access and attendance management for enhanced efficiency.

Simultaneously improve security and manage employee attendance in the modern workplace. Provide safe and convenient access without plastic keycards or fobs, which can be easily lost or stolen. Plus, you can combine attendance and access data to maximize security and minimize malicious use by insiders and outsiders.

Automatically open door and activate timecard through live face-recognition access control.

Set attendance rules, including workweek, holidays, business trips, leave, etc.

Remotely manage access control machine. Users self-upload facial image—no need for administrator action.

Create attendance records report, individually or by department, branch, or other dimensions, to obtain attendance statistics and office automation (OA) insights.

Lenovo
Retail

Embrace the future of retail.

Lenovo Retail creates smarter and safer stores that transform the shopping experience and deliver data-driven business results. Our unified digital solutions bridge end-to-end retail needs, including hardware, software, servers, tech support, and services. With intelligent design and technology infrastructure, Lenovo elevates the in-store buying—and selling—experience.

- Supercharge your infrastructure.
- Improve the customer experience.
- Optimize labor efficiency.

Beyond the Numbers: Lenovo Retail Solutions

Smarter technology for all **Lenovo**

Electronic Shelf Labels + Self-Service Kiosks

Buy back time with smarter pricing.

Lenovo electronic shelf label solution optimizes labor, making the most of your workers' time and company resources and reducing error rates.

Update 18K ESLs/hour.

NFC and cellular network functionality.

2-way communication with standard encryption for additional security.

Centralized solution— no need for servers or devices in stores.

5-year+ battery life

Hanshow

Bringing smart thinking into physical retail.

Lenovo has a broad range of point of sale systems, including modular, mobile, and all-in-one. Durable, scalable, and extendable, these innovative systems can be used across multiple platforms to meet your distinctive needs. Compatible with POS software of all kinds, Lenovo systems feature a long product lifecycle and global service support.

- Broad portfolio of front-of-store solutions to support customer service.

- Offered in both touch and non-touch formats.

- Lenovo can deliver tailor-made kiosks customized for your business needs.

POSIFLEX

Don't just inform. Engage.

Effectively communicate with your workforce and customers with this integrated digital communication and content management solution from Lenovo. IoT-driven signage lets you implement consistent and audience-specific messaging that gets attention.

- Engage with your customers, enhance loyalty, boost brand recognition and improve the retail shopping experience.

- Improve quality and consistency of internal and outward-facing communications.

- Extend reach and availability of timely, accurate information.

- Enhance usability and security of organizational content.

Lenovo

Understand the customer journey to boost your bottom line.

Lenovo customer analytics solution drives merchandizing decisions and automates customer capacity counting. With advanced security cameras, need-specific software, and an easy-to-use analytics dashboard, brick-and-mortar retailers can know their customers as well as online retailers do.

COUNT CUSTOMERS

UNDERSTAND THEIR JOURNEY

EVALUATE MARKETING AND LAYOUT

MINIMIZE SHRINK

- Stay GDPR-compliant and get valuable insights.

- Learn how customers shop: route taken, visit duration, visit frequency, heatmaps.

- Get positive sales and conversion impact from one camera.

- Optimize merchandising: validate product layouts and marketing campaigns.

- Improve store conditions: wayfinding, safety adherence, targeted store cleaning.

- Stream security feeds to employees as they walk the store.

- Adjust store hours and cleaning/ stocking schedules bases on each store's unique patterns.

SEE HYBRID CLASSROOM IN ACTION

Lenovo VR Classroom is immersive learning that's simple by design.

Providing a seamless combination of hardware, software, and device and content management, VR Classroom empowers educators, administrators, and IT staff at every learning level to easily integrate virtual reality lessons for real-world application—right out of the box. With Lenovo, every classroom can be a VR classroom.

Lenovo's ThinkReality platform and LanSchool Air software allow for remote management and control of all devices from a single source. Plus, online or onsite training and responsive support enable educators to deliver VR lessons with confidence. Access a wide variety of academic content through partnerships with with Uptale and VEATIVE—or create your own!

REGION AVAILABILITY: NA (US AND CANADA), AP (ANZ), LAS (MEXICO, PERU, COLOMBIA, CHILE), EMEA (UK, FRANCE, ITALY, BELGIUM)

Redefine the learning experience with Lenovo Smart Classroom.

With a mix of onsite and remote learning in schools, teachers, students, and parents depend on technology to ensure collaboration extends beyond the classroom.

As the leading provider of educational technology, Lenovo brings you a blended classroom experience through Lenovo Smart Classroom, an intelligent interactive education solution that combines AI, Big Data, Cloud Computing, and other intelligent technologies to empower K-12 schools to better organize instructional workflows.

Simplify Teaching—Distribute instructional resources digitally and collaborate easily using digital whiteboard, screenshare, and more.

Visualize Progress—Evaluate student performance with realtime learning analytics and dashboard.

Engage Students—interactive learning through gamification, pop quiz, group discussions, and practice tests.

Ensure Safety— Secure student devices and monitor content within classroom and remotely.

REGION AVAILABILITY: AP

Instructional Software

Engage students with robust learning options, including tech-enabled curriculum, STEM and CTE readiness, and digital creation tools.

exploros™

- In-app streaming
- Robust analytics at the class, school, and district levels
- High-quality lessons aligned to standards
- Teacher notes and guidance for facilitating lessons

VEATIVE

- Lesson library of 500+ VR experiences with learning objectives and assessments
- Accessible on any device with an internet connection
- Robust reporting and analytics for engagement and performance
- Compatible with Lenovo VR Classroom headsets

LANSCHOOL

- Screen monitoring, limited web features, and compliance reporting for a safe online learning environment
- Promote collaboration with 1:1 and 1:many features like messaging, raise hand, and screen sharing
- Google Classroom and Clever integrations

Google Creativity Apps for Chromebook

- User-friendly interface, easy manage-ability, and multi-layered security
- Licenses can be purchased and easily managed within the Google Admin Console
- Apps foster interactive teaching and learning—without in-app purchases needed

REGION AVAILABILITY: Varies by software title. Please contact us for country-specific information and availability.

Security, Safety, & Device Management Software

Track, access, and protect remote devices 24/7 and effectively manage live class sessions with tools to share and filter content.

ABSOLUTE®

- Full endpoint visibility to track, control, protect, and reclaim distributed devices.
- Factory-installed for instant visibility and control
- Unbreakable security control, with remote repair and self-healing of critical software
- Easy to deploy and manage from anywhere with unified cloud-based console

SentinelOne™

- Saves time by using multiple AI engines providing visibility into all endpoints
- Protects infrastructure from IoT attacks and compromised devices
- AI-based prevention ad detection that acts in real time, even without cloud connectivity
- Flexible and centralized management

Lightspeed Systems®

- Lightspeed Filter monitors and controls activity to block inappropriate sites and content.
- Lightspeed MDM and Analytics pinpoint effective utilization and device efficiency.
- Lightspeed Classroom Management keeps learners focused and engaged.

Google Workspace for Education

- Foster interactive learning and teaching
- Purchase software with hardware or standalone
- Dedicated support, advanced analytics, and security controls

Setting a solid foundation for the future.

Preparing students for their future workforce opportunities is an essential role of educators. Lenovo Workstations empower the most creative and innovative ideas that students can imagine. These high-performing PCs are the right fit for learners to experience core technology used in the fields of media & entertainment, finance, engineering & manufacturing design, and healthcare. Advanced workstation labs are ideal for the best of STEM and CTE instruction, as well as esports programming.

CERTIFICATION

Lenovo Workstations are all tested and certified by independent software vendors (ISVs) to ensure stability and reliability for optimal performance.

PROCESSING PERFORMANCE

Our workstations provide the highest level of power and performance to handle the most demanding education workloads, from artificial intelligence databases and machine learning algorithms to high-end engineering design.

ROBUST SECURITY

Lenovo Workstation solutions with the comprehensive protection of Lenovo ThinkShield deliver secure productivity for students, staff, and faculty.

SOLID SUPPORT

Lenovo provides end-to-end services for your education workstations, from Premier Support with 24/7 expert support to our flexible and cost-saving DaaS solution.
