All battery life claims are approximate and based on the median user tested across a mixed use profile (which includes both usage and standby time) under optimal network conditions. Actual battery performance will vary and depends on many factors including signal strength, network and device settings, temperature, battery condition, and usage patterns. Battery must be substantially depleted; charging rate slows as charging progresses. Supports up to 512GB microSD card, microSD cards sold separately. Content with DRM restrictions may not be able to be moved to the card. 4. The 48MP sensor combines 4 pixels into 1, for an effective photo resolution of 12MP. 5. Water-repellent design creates a barrier to help protect against moderate exposure to water such as accidental spills, splashes or light rain. Not designed to be submersed in water, or exposed to pressurized water, or other liquids; may diminish over time. Not waterproof.
