WORKPLACE X BROTHER

“At your side”, whatever your business challenge

Working closely with you, we are committed to developing and implementing workplace infrastructures that deliver for the teams of today.

Our “At your side” promise means that, whatever challenges you or your customers face, we’ll be there, collaborating with you and providing the expertise you need to put the right solutions in place.

Print and scan solutions play a key part in this. Brother hardware, services and solutions - helping teams to operate seamlessly in any setting.

Unlocking productive, cost-efficient working

We help businesses optimise their print infrastructure and give them visibility, certainty, and control over cost at scale, while providing a seamless experience for your customers. Our hardware, services and solutions help businesses maximise cost efficiency and productivity from day one.

Secure in today's hyper-connected world

Our solutions help businesses to navigate the frontiers of risk across cyberspace. Incorporating triple-layer network, document and device security, our technology gives organisations confidence their assets remain protected.

Supporting greater sustainability

Every business is looking to reduce its impact on the planet, and we are no different – it's a fundamental part of what we do.

We develop long-lasting, efficient and durable hardware that is repairable and includes energy-saving features. Our cartridges are 100% reusable or recyclable, so we can guarantee zero waste goes to landfill. Together with our partners and customers, we're striving for a more sustainable and carbon-neutral future.

Why Brother?

At Brother, we're committed to providing businesses with the expertise they need to make smart decisions and implement printing solutions that can stand the test of time.

We take steps to anticipate changes to your customers' needs, continuously improving their experience.

We offer print technology solutions to suit all sectors and their requirements, leaving you with satisfied customers and a reputation for providing the best products and services.

We are the ideal partner for customers seeking choice without compromising on quality, thanks to our diverse portfolio of devices, our solutions and our partnerships with leading third-party software vendors.

A secure workplace

The connected technology of today's working environments has created growing security challenges for all businesses. Our hardware, services and solutions provide triple-layer security, which protects devices, provides document confidentiality and locks out infiltrators from accessing networks.

Our professional printer range puts secure printing first. Devices are designed to automatically monitor for irregular network activity and shut down upon detection of malicious processes, keeping data and the device safe, while ensuring it can't be used as an entry point to secure networks.

In addition, businesses are also protected using end-to-end encryption and port-based access control, designed to allow users to connect and share documents with confidence.

Both ours and third-party integrated document security upgrades further protect important documents and improve print security, providing your customers with added peace of mind. These advanced solutions mean that only authorised users can print sensitive documents ensuring confidential data never falls into the wrong hands.

A cost-efficient and productive workplace

Brother can help businesses optimise their print infrastructure, providing visibility, certainty, and control over cost at scale, even for the most complex set ups.

A key part of managing costs and reducing expenditure is implementing more efficient technology.

Our easy-to-integrate solutions combine innovative hardware and software, enabling your customers to monitor and analyse their print volumes and control costs.

Our technology solutions combine extremely reliable, high-performance hardware with smart workflow solutions to deliver significant cost and time-efficiency gains.

A sustainable workplace

Sustainability matters to every business – and we’re no exception. Which is why minimising our impact on the planet is a fundamental part of what we do. From developing long-lasting, efficient, and durable hardware, to ethically recycling and reusing 100% of our toner cartridges.

Our products are designed with sustainability in mind from the very start, from sourcing materials responsibly to building highly durable devices that can be repaired when needed.

We are committed to sending zero waste to landfill, so we’ll recycle any used toner cartridges returned to us via partners or customers at no extra cost.

Modular repairs are built into the design of our hardware, making it easier to source and replace individual parts, helping extend the lifecycle of our products and supporting customers’ goals of reducing waste.

We are dedicated to providing sustainable technology and solutions and we are committed to being part of the change. Together with our partners and customers, we continue to strive towards a more sustainable and carbon neutral future.

A service tailored to your customers – MPS from Brother

Managed print services (MPS) represent a more streamlined way of setting up businesses with a print solution that is tailored to their needs, all while providing a recurring revenue stream for you.

Our MPS solutions take care of all your customers' print requirements and are scalable to any size of business. We will design and install a printing infrastructure that is best suited to their print volume and ensure the right devices are put in place. For maximum efficiency, print usage can be easily monitored and customers will benefit from automated delivery of high yield supplies to their business when they need them.

With Brother MPS, your customers can rest assured that they will receive ongoing first-class customer service and technical support.

Seamless integration with your customers' documentation software

For truly high-performing print and scan solutions, effective integration with enterprise and automation software is often vital.

That's why we have invested in developing partnerships with leading software providers to create tailored solutions for your customers' specific requirements.

We partner with a range of industry-leading software providers including Kofax, Papercut and YSoft, and many others. As well as our existing partners, we are always looking to develop new relationships with providers to ensure that our solutions seamlessly integrate with your customers' existing print infrastructure.

ADS-4700W

ADS-4900W±

±Kofax compatible device *Specification specifically for ADS-4900W

Brother upgrades

Whether it's a professional laser printer or a powerful document scanner - there are various upgrades available for many Brother devices which can help lift work processes to new levels. From efficient document processing via barcodes and secure printing to adapting the display to suit specific needs - in the following overview of the devices you can discover what options the various models offer your customers.

Barcode Utility

Enables documents that have a barcode to be scanned and saved to the required location.

Custom UI

Create specific workflows for frequent 'scan-to' destinations on the customisable touchscreen, enabling files to be saved to the correct location in one touch.

Secure Print+

Sensitive documents are only printed when users are ready to collect from the printer. Only authorised staff can collect their documents and users are easily added and removed.

Secure Print Advanced

Building on the functions of Secure Print +, Secure Print Advanced introduces follow me print functionality, allowing users to collect their print job from any printer on the network.

Barcode Print+

Easily print barcodes from a Brother printer. Simply supply the printer with the information for the barcode, the barcode is then printed exactly as it should appear.

Request Help

A full diagnostic report is created and automatically emailed to a nominated IT administrator to easily troubleshoot errors that may occur.

Remote Panel

Your IT provider can access the full functionality of your printer, to quickly diagnose and resolve any issues and enable settings to be changed as if they were physically standing at the printer.

Order Supplies

Effortlessly order toner cartridge supplies directly from the printing device, ensuring you never run out of toner when you need it.

ThinPrint Client

Print compressed documents from a virtual environment, easing the strain on IT. It also enables lucrative cost savings in any environment.
