

exertis

We only have one planet. And it's our job to keep it clean. Here's how we're working together with some top tech brands to help the planet. One little change at a time.

What's your plan to save the world?

Lenovo

Lenovo have decreased greenhouse gas emissions by **92%***. This was achieved by creating lighter, bio-based packaging that reduces overall packaging size and increases transport efficiency. And their new, sustainable processes build stronger and more reliable devices.

**scope 1 and scope 2 emissions*

Dell

All of Dell's devices are made of up to **65%** post-consumer recycled material. Their packaging follows this sustainable concept, with the use of ocean-bound plastics and **85%** of all packaging being made from recycled and renewable materials

Philips

Not only do Phillips use **100%** recycled packaging material for all their products. But they also utilise up to **85%** of post-consumer recycled plastics in selected models within their range.

APC

APC provides replacement battery cartridges and packs that conform to required standards for lead acid batteries. And customers of Schneider Electric can use the Green Premium Eco-mark tool to calculate their carbon footprint.

Brother

Today, up to **87%** of returned Brother cartridges are reused or recycled. And in their partnership with Tameside Greenspace, Brother work to help improve woodland and greenspace areas through pollution control, landscape diversity, and other essential services.

Lexmark

Reclaimed PCR plastic is incorporated into nearly **60** Lexmark supplies components at a level up to **100%**. And the award-winning Lexmark Cartridge Collection Program gives users a free and easy way to return Lexmark toner cartridges to specialised Lexmark recycling centres.

OKI

OKI promote the recycling of used products through the Cross-jurisdictional Waste Treatment Manufacturer scheme. In 2019, their combined recycling and reuse rates reached **100%**

CHERRY

When a keyboard or mouse comes to the end of its usability, CHERRY ensures they're properly recycled, at no cost to the user. And their Blue Angel eco-label reassures customers that they're always getting the most sustainable option.

Western Digital

In Fiscal year 2020, WD achieved the following milestones:

- 3.8%** Year-over-year reduction in energy usage
- 25%** Year-over-year reduction in energy intensity
- 5.2%** Year-over-year reduction in Scope 1 emissions CO2 e
