Lenovo Health

Augmented Reality (AR) Offering for Healthcare

New possibilities for care delivery and clinical collaboration

AR empowers clinicians with real-time workflows, collaboration, and information

Improve the dynamics of doctor-patient interactions and empower doctors to solicit expert advice in real time with a "You see what I see" view.

Lenovo's ThinkReality AR Offering for Healthcare leverages modern devices like the ThinkPad® T14 and ThinkPad® X12 Detachable. Both devices feature the Intel vPro® platform for business-class performance and built-in enhanced security features.

Together with the ThinkReality A3 smart glasses and ThinkReality platform, this innovative offering opens new doors to make healthcare delivery more personal, comprehensive, and efficient.

Why AR?

Hands-free access
Remove manual tasks and distractions to focus on the patient.

Expert guidance with remote collaboration
Collaborate with specialists in real time from anywhere while sharing the same patient view for better assessments.

Real-time access to context-specific information
Access complex workflows and data on the go for enhanced efficacy.
