Installation

Warning! Make sure that the weight of the TV doesn't exceed the weight capacity of this product. If you exceed the weight capacity, you might experience personal injury or damage to the product. This product can support the following weight: Up to 110 lb. (50 kg).

Attach the ceiling mount and pole to the ceiling

Warning! Ceiling structures vary, and it's important to make sure that the type of structure and mounting hardware that you're using will properly support the mounted equipment. Failure to do so may result in personal injury and/or equipment damage. The ceiling should be capable of supporting at least four times the weight of the mounted equipment.

Warning! The mounting hardware included with this product might not be adequate for some ceiling structures. If you lack the necessary expertise to attach this product to the ceiling that you're using, contact a construction professional to install the FLATPNLCEIL or to provide specific mounting instructions for your ceiling.

1. Use a pencil and the provided mounting template (9) to mark the location on the ceiling where you want to attach the ceiling mount.
2. Follow the appropriate steps for the type of ceiling that you're attaching the mount to and attach the ceiling mount and pole (1) to the ceiling.
3. To vertically position the pole, use the M13 wrench (7) and the M5 Allen key (8) to adjust the nut at the side of the mounting base. (figure 1)

figure 1

Attach the extension pole to the ceiling mount and pole

1. Place one end of the cable through the top hole in the ceiling mount and pole (1).
2. Run the cable through the ceiling mount and pole and the extension pole (2), and out the bottom of the extension pole. (*figure 2*)

figure 2

- Slide the extension pole into the ceiling mount and pole, until the extension pole is at the height that you want it to be. (figure 3)
- Line up the holes on the extension pole with the holes on the ceiling mount and pole.
- Insert the two bolts (5) through the holes in the ceiling mount and pole and the extension pole.
- Attach the two nuts (6) to the bolts, and use the M13 wrench (7) and the M5 Allen key (8) to tighten the nuts in place. (figure 4)

figure 3

figure 4

Attach the horizontal bracket

1. Use a wrench to remove the retainer nut from the back of the horizontal bracket (4). (figure 5)
2. Loosen the two nuts at the back of the horizontal bracket.
3. Attach the horizontal bracket onto the mounting bracket at the end of the extension pole (2).
4. Reattach the retainer nut that you removed in step 1 and use a wrench to tighten the nut in place. (figure 6)
5. Tighten the two nuts that you loosened in step 2.

Select the appropriate mounting hardware

To accommodate different TV designs, the FLATPNLCEIL comes with three sets of screws of different lengths and diameters, and two sizes of spacers.

To select the combination of mounting hardware that you need to use to attach the vertical brackets to the TV, complete the following:

- Determine whether the back of the TV is flush or inset.
- Determine the depth of the mounting holes on the TV.
- Determine the diameter of the mounting holes on the TV.
- Consult the images below to see the different hardware combinations available, and select the one that works best with the TV.

Note: If you're using a TV with a flush mounting surface, you don't need to use any of the provided spacers.

The following screw sizes work with a **flush mounting surface**:

M5x14 mm

M6x14 mm

The following hardware combinations work with an **inset mounting surface**:

M6x30 mm

or

M8x30 mm

or

or

(continued from previous page)

The following hardware combinations work with an inset mounting surface:

Attach the vertical brackets to the TV

Warning! Do not over-tighten the screws. If you encounter resistance while you're tightening the screws, stop tightening. Failure to do so could result in damage to the TV.

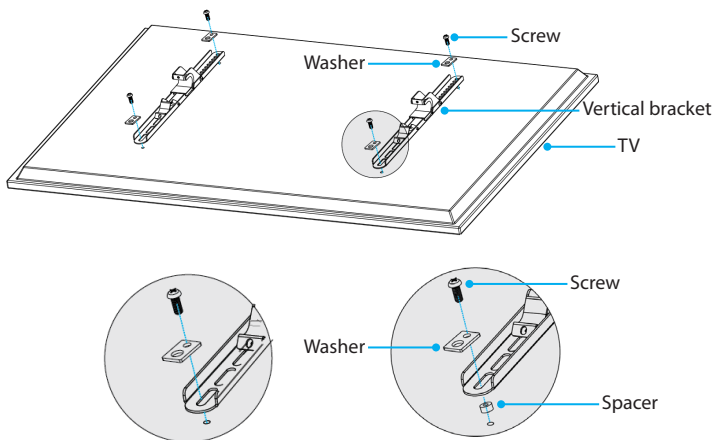

1. Use a screwdriver to remove the screw from the mounting hardware on each of the vertical brackets (3). (figure 7)
Put the screws to the side; you will need to use them when you hang the TV.
2. Flip down the smaller piece of the mounting hardware.

figure 7

- If you're attaching a TV with an inset mounting surface, place the spacers over the mounting holes on the back of the TV.
 - With the mounting hardware pointed towards the bottom of the TV, position the vertical brackets so that the holes on the vertical brackets line up with the mounting holes or spacers on the back of the TV. (figure 8)
 - Position the four washers (15) over the holes on the vertical brackets.
- Note:** There are small and large holes in the washers to accommodate different screw sizes.
- Insert the screws into the washers, the vertical brackets, the spacers (if required), and into the back of the TV.
 - Use a screwdriver to tighten the screws. (figure 8)

figure 8

Attach the TV to the horizontal bracket

Warning! Attaching the TV is a two-person job. Do not attempt to hang the TV by yourself.

1. Carefully lift up the TV and hook the mounting hardware on the vertical brackets (3) onto the horizontal bracket (4) attached to the extension pole (2). (figure 9)
2. Close the mounting hardware, and use a screwdriver to reinsert the screws you removed from the mounting hardware on each of the vertical brackets. (figure 10)
3. Tighten the screws in place.

figure 9

figure 10

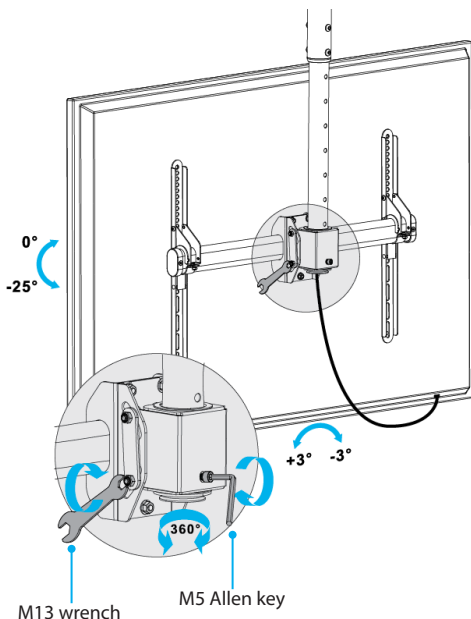

Adjust the TV

1. Do any of the following:

- To adjust the tilt of the TV, loosen the nuts on the side of the horizontal bracket. Adjust the TV to the position that you want it in, and then tighten the nuts on the side of the horizontal bracket. (figure 11)
- To swivel the TV right or left, loosen the rear retainer bolt. Adjust the TV to the position that you want it in, and then tighten the rear retainer bolt. (figure 11)
