CyberSmart

CYBERSMART DASHBOARD

The CyberSmart Dashboard guides your business through a journey to become cyber secure. It starts with assessing how you're doing and leads you all the way through to achieving security your customers can trust.

But CyberSmart doesn't just help your business take steps to become cyber secure, it keeps it that way long into the future.

CyberSmart monitors all your business's devices 24/7. It checks for the most up-to-date applications, operating systems, firewalls, security measures and compliance with Cyber Essentials – protecting your business against 98.5% of cybersecurity threats.

All of this is available in the CyberSmart Dashboard, which allows you to check the status of individual employees' devices, resolve any security issues in-app and distribute security policies across the entire business.

CyberSmart can even improve understanding of cybersecurity within your business, with engaging training modules delivered straight to employee's devices.

Key Features
- **Comprehensive device monitoring**
- **Live security information on all company devices**
- **Step-by-step instructions on how to fix security issues**
- **Company policies housed in-app**
- **Downloadable device, policy and software reports**
- **Ability to bulk install platform across multiple devices**

THE CYBERSMART APPROACH

The innovation behind CyberSmart provides a scalable and accessible solution to protect businesses from cyber attacks by using intelligent technology to align with recognised security standards on a continuous basis. The modern digital security team, **CyberSmart takes customers from zero to secure in a seamless way.**

| THE CHALLENGE	1. PROTECT	2. ASSURE	3. MAINTAIN
Business has limited security knowledge and tooling in place	*Smart software and device checks, that recommend fixes for technology in use*	*User training, cyber policies and procedures to create a cyber aware culture.*	*24/7 monitoring delivering actionable insights to keep the organisation secure*

THE SECURITY TEAM OF THE FUTURE, TODAY

CyberSmart replaces the need for security teams, external consultants and creates a single unified experience and a cyber aware culture in your company.

Going beyond traditional models of assurance, providing trust to the organisation in their data, validation to external parties and the peace of mind this remains in place.
