1 Overview

Summary

In iOS, AirPrint-enabled applications can print to an AirPrint-enabled device—and you don't need to install a driver or configure the printer queue. Tap print, select an AirPrint-enabled device, and print. It's that simple.

Products Affected

Mac OS, OS X Lion, OS X Mountain Lion, iPad, iPhone, iPod touch

AirPrint

AirPrint is an Apple technology that lets applications create full-quality printed output using Apple's driverless printing architecture. All iOS built-in apps that support printing use AirPrint. Apps on the App Store that use the iOS printing system also use AirPrint.

AirPrint iOS requirements

To use AirPrint, you need one of the following devices with the latest version of iOS:

- iPad (all models)
- iPhone (3GS or later)
- iPod touch (3rd generation or later)

AirPrint OS X requirements

- OS X Lion
- OS X Mountain Lion

View the Apple website for the latest information.

2 Configuration

In order to use AirPrint, you must connect to the network that is connected to your mobile device. Wireless-model supports only Infrastructure mode.

Infrastructure mode

Devices and mobile devices connect via wireless access points. Devices and access points connect via wireless or wired.

Ø

Device

3 Printing

AirPrint-enabled applications can print to an AirPrint-enabled device. You don't need to install a driver. Tap print, select a AirPrint-enabled device, and print.

Products Affected

- > iPhone, iPad, or iPod touch with iOS 4.2 or later
- > MAC OSX 10.7 or later

You can print from the Apple applications Mail, Photos, and Safari. Apps available from the App Store may also offer this feature.

After this, MC562 is used as an example.

For iOS

- **1** Open the file you want to print from an application.
- 2 Tap the action icon .
- **3** Tap the Print button.

4 Configure the printer options.

Printer Options												
Printer	Select Printer >											
Range	All Pages >											
1 Сору	- +											
	Print											

4-1 Select Printer.

Pr	inter Options
Printer	OKI-MC562-5470D5 >
Range	All Pages >
1 Сору	- +
Double-sid	ed ON
	Print

! Note

- If you print first time, or if the previous selected printer is not available, you need to select a printer.
- When you select a printer, the functions supported by the device will be displayed in addition.

4-2 Set options.

Printer Options											
Printer	OKI-MC562-5470D5 >										
Range	All Pages >										
1 Copy	- +										
Double-si	ded ON										
	Print										

Range: Set pages to be printed.

* You cannot select this item with the Application in use.

Copy: Set number of copies to be printed.

Double-sided: Specify double-sided printing.

5 Tap Print.

! Note

If you want to print from the MP Tray, please set the device's PaperFeed settings to MP Tray.

Viewing the Print Queue

You can check the Print Queue by double-tapping the Home button to show the recently used apps. Then tap the Print Center.

! Note

The Print Center is only available while printing is in progress.

For Mac OSX

For Mac OS X 10.7 or later

Add Printer

- 1 Check that your device and the computer are turned on and connected.
- 2 From the Apple menu, select [System Preferences].
- 3 Click [Print & Scan].
- 4 Click [+] and select [**Printer**] on the pop-up menu.

! Note

With MC562, select the device name, such as [OKI-MC562-5470D5].

5 Check that your machine is displayed in [**Printers**] and [**MC562-AirPrint**] is displayed in [**Kind**].

6 Close [Print & Scan].

Starting a Print Job

- **1** Open the file you want to print from an application.
- 2 From the [File] menu, select [Print].
- 3 Select the [OKI-MC562] from [Printer].

4 Set [**Copies**] input copy number.

5 In [**Preview**], set the options. Example: PaperFeed, etc.

6 Click [Print].

4 Menu

AirPrint

FUNCTION	OPTION	DESCRIPTION
AirPrint	Enable	Displayed when AirPrint is available.
		(Disable will not be displayed)

FUNCTION	OPTION	DESCRIPTION
AirPrint	Enable	Displayed when AirPrint is not available.
	Disable	

! Note

When Bonjour or IPP is not available, AirPrint function will be disabled. When you want to use AirPrint, please contact your system administrator. After that turn AirPrint function enable.

5 Troubleshooting

■ When the message "No AirPrint Printers Found" is displayed in iOS device

Verify that the printer:

- **1** Has power and is turned on. If it has power, turn the printer off and then on again to see if that resolves the issue.
- **2** Is connected to the same network as the iOS device.

When unable to print

Verify that the printer:

- **1** Has power and is turned on. If it has power, turn the printer off and then on again to see if that resolves the issue.
- **2** Is connected to the same network as the iOS device.
- **3** Has the latest firmware version installed.
- **4** Has paper with enough toner installed.
- **5** Has no error.

If necessary, refer to printer User's Manual for help with the above steps.

! Note

Printers can take several minutes to join a network after being turned on. Ensure that the printer is connected to the network before attempting to print.
