

The smarter choice to suit every need

EPSON[®]
EXCEED YOUR VISION

Why choose Epson?

Our goal

We strive to achieve sustainability and enrich local communities.

Sustainability features in every aspect of our business. Among other things, Epson achieved EcoVadis Platinum status in 2020. This rating places us in the top one per cent in sustainability for companies in our industry globally.

Our commitment

We recognise that we have a responsibility to build a better tomorrow, today. In fact, in 2019 alone, Epson recycled more than **19,630,00kg of WEEE** (Waste Electrical and Electronic Equipment), **9,400kg of batteries** and **800,000kg** of plastic.¹

Our innovative technology

We create our own technology. Unlike most of our competition, we don't use heat in our print technology. This means we save energy and achieve better sustainability, end users see fewer consumables and you achieve additional profitability.

We use 3LCD technology, using up to **25% less electricity**² whilst offering end users up to three times brighter colours and you additional profitability.

Epson is the clear brand of choice for profitability, sustainability and quality.

Up to
83%
less energy and CO₂
emissions compared to
laser printers¹

Up to
96%
fewer used consumables
than laser printers¹

Up to
25%
less electricity per lumen
of brightness²

Up to
3x
brighter colours with
Epson projectors⁵

We've changed printing forever

With Epson, there is a choice of print solution to offer end users: standard cartridge and ink tank printers.

Customers looking to achieve longer term cost savings should consider our EcoTank range. EcoTank printers feature a large ink tank that you fill with the included ink bottles instead of cartridges. There is enough ink included to print up to 14,000 pages. One set of ink bottles is equivalent to 72 ink cartridges, which makes a big difference in terms of both waste and transportation. What's more, delivery costs can be cut down, due to fewer shipments required, which also reduces the amount of time that needs to be spent packaging cartridges for shipping.

Customers with a budget looking to spend smaller amounts up front can select from our wide range of sustainable, cost saving cartridge products. Compared to laser printers, Epson Inkjet printers reduce energy usage and waste, while boosting productivity, without sacrificing quality. In addition, the inks can be purchased individually, meaning that only the colours used need to be replaced.

With both options available, Epson has the right solution for every situation.

How to choose the right printer

From home office to large enterprise use, Epson offers a wide range of inkjet printers that can help save money, time and unnecessary hassle to help business grow. From EcoTank to WorkForce Enterprise, each range offers unique features. Use this guide to help select the right printer to suit customers business needs.

Release the potential of a dynamic workflow

Improve your flexibility with the support of a global leader in scanning solutions. An essential part of modern living is the ability to transform physical documents into useable data. Whether at home, on the road, in a reception or at your office desk, Epson have the ability to create better workflows that reduce the reliance on paper.

In stark contrast to previous years, today, not all employees are based in an office, presenting a challenge in document sharing, handling and security. The opportunity to scan and share electronically provides a greater degree of GDPR compliance.

Our range is already one of the largest available, and because of Epson's stability, we are committed to continuing to develop and expanding the range going forward.

The future in projection technology

As the No.1 in the projector market since 2001⁴, we have an extensive knowledge of display solutions. We know that size and clarity matter. Whether in a classroom, a meeting room, studying complex plans and documents, or sitting in your living room, our display solutions deliver a more meaningful experience through large scale, crystal clear images.

EPSON
WORLD LEADER
IN PROJECTORS

No-one sells more projectors than Epson. Why? Because our display solutions bring content to life thanks to bright, vivid and clear images, even in brightly-lit rooms.

We manufacture our own 3LCD technology, delivering up to **3x brighter**⁵ colours and using **25% less electricity**² per lumen of brightness. Epson ensures that its projectors have an equally high white and Colour Light Output (CLO).

Brightness alone is not enough to bring the true colours you see everyday to life. Following this philosophy, only Epson's 3LCD technology combines brightness and True Colour to create vivid, lifelike images. We do this by making sure the coloured light our projectors show is just as bright as the white light.

Brighter, vivid projection from Epson

In a comparative test, **99% of people** chose Epson as having the most vivid colours when compared with competitor models⁵. **8 out of 10 people** said that Epson has the highest image quality⁶.

A selection of our display solutions are TCO certified⁷, proving that Epson is the ideal choice for sustainable solutions. TCO Certified is a world-leading global sustainability certification for electronics, founded over 25 years ago. By choosing products with these certifications, you can meet your customers' demands of the present without compromising future generations.

Our commitment to the environment coupled with our own technology make for an unbeatable solution, proving once again that technology can be both sustainable and deliver outstanding results.

Innovative display solutions to leave a lasting impression

We work hard to develop innovative and versatile projectors that meet your needs and allow you to make a lasting impression. Our commitment to product quality, technology, relationships and service and support is the reason we have been market leader for projectors since 2001.

1 Sum of amount actually collected and expected to be collected.

2 Data source: ProjectorCentral.com, Jan. 2014. Average of 1,243 shipping models for which the manufacturers provided lumens and total power data, all resolutions and brightness levels. Energy efficiency was measured as wattage per lumen. It was measured for both 3LCD and 1-chip projectors in each of five brightness segments. 3LCD projectors averaged less required electricity per lumen in each of the five segments.

3 Based on Infotrends data 2019.

4 Survey conducted by Futuresource Consulting for the period from 2001 to 2019.

5 Colour brightness (colour light output) in brightest mode, measured by a third-party lab in accordance with IDMS 15.4. Colour brightness will vary depending on usage conditions. Top-selling Epson 3LCD projectors versus top-selling 1-chip DLP projectors based on NPD sales data for May 2017 - April 2018.

6 In August 2015 Epson conducted a blind shoot-out between its 3LCD projector, EH-TW5200, and competitor 1-chip DLP projectors: BenQ TH681+, Optoma HD26; Acer H6510BD and Viewsonic PJD7822HDL. The competitor projectors have the same resolution as the Epson projector (1080p resolution (1920 x 1080), the same quoted lumens level of the Epson projector or above, and minimum contrast ratio of 10,000:1.

7 Epson achieved certification by TCO Certified for its family of projectors. TCO is the world's most comprehensive sustainability certification for IT products, which must meet life cycle criteria for social and environmental sustainability. Applies to select products.
